

Coated Glass Drawing Template Guide

Applicable for AR/AG/AF display & optical glass

1. Mandatory Drawing Parameters

1. Glass substrate material & thickness
2. Length × width dimension + tolerance
3. Coating type: single side / double side composite coating
4. Haze / transmittance target value
5. Edge treatment, silk screen black frame requirement
6. Working environment: indoor / outdoor / medical disinfection

2. Common Shape Templates

Rectangular touch panel, square optical window, circular instrument cover glass

3. Processing Reminder

Composite multi-layer coating requires strict dust-free workshop production to avoid spot defects. All sizes, haze and transmittance support full OEM customization.
