

Appliance & Smart Glass Application Manual

Document No. : FG-ASG-001 | Rev. 1.0 | 2026 Manufacturer: Hong Kong Felix Glass Co., Limited

Primary Core Application Cases

1.

Smart Home Control Terminals Custom tempered smart touch glass serves as interactive surfaces for intelligent switches, central control panels and home automation terminals, balancing safety, touch smoothness and decorative consistency.

2.

Household Appliance Functional Panels Silk-screen printed and tempered glass substrates are widely used for oven, range hood, water dispenser and purifier front panels, providing durable wear-resistant surfaces and integrated appearance design.

Secondary Application Scenarios

- Kitchen and bathroom intelligent equipment protective glass
- Small household appliance hidden display windows
- Commercial intelligent device decorative and functional panels
- Custom home intelligent terminal customized glass structures
-

Covered Industrial Fields

Smart home automation terminals, household appliance manufacturing, kitchen & bathroom intelligent equipment, consumer intelligent electronic panels, commercial interactive terminal decoration

Service Overview

Appliance and smart glass can be fully customized in material thickness, dimension, printing design and surface finishing. Production scheduling and lead times are confirmed according to order quantity, pattern complexity and customer project requirements. Batch inspection records and technical support are available for global appliance industry buyers.

The information contained in this document is provided for reference only. Final specifications are subject to mutually approved engineering drawings, production capability review, and customer project requirements.
