

Functional Display Coated Glass Drawing Template Guide

Applicable for touch panel glass, display cover glass, automotive smart glass

1. Mandatory Drawing Information

1. Glass substrate material & thickness tolerance
2. Overall length × width dimension
3. Coating scheme: single/double side, composite AR/AG/AF coating
4. Optical target: transmittance / haze requirement
5. Processing demand: edge chamfer, black silk screen frame, cutout holes
6. Working environment: medical disinfection / outdoor sunlight / vehicle interior

2. Common Shape Templates

Rectangular touch cover glass, square instrument window, circular automotive display glass

3. Production Reminder

Multi-layer composite coating is manufactured in Class 1000 cleanroom to avoid spot defects. All sizes, haze and transmittance support full OEM & ODM customization.
