

## Touch Panel Glass Quality & Compliance Certification Summary

### **1. ISO 9001:2015 Quality Management Certificate**

Full process control of touch glass cutting, chemical strengthening, coating and finished inspection with full batch traceability.

### **2. RoHS & REACH Compliance Test Report**

Heavy metal limit test passed, safe for export medical, automotive and industrial electronic products.

### **3. Raw Material SGS Composition Test Report**

Certify glass substrate purity without impurities that affect touch signal and optical performance.

### **4. Coating Wear Resistance Calibration Certificate**

Lab abrasion test data of AG/AR/AF functional coating to verify long service life for frequent touch operation.

### **5. Batch Inspection Record Standard**

Each touch glass order attaches independent IQC, IPQC, FQC inspection data, including hardness, transmittance and touch resistance test records.

Original scanned certification files can be sent by email for supplier audit and customs clearance.
